INTRODUCTION

Journey-To-Work in Massachusetts 1990 quantifies the flow of workers who commute both within the state and across Massachusetts' borders. This report contains the top 10 work destinations and the top 10 residences of workers for all cities, towns, and counties in Massachusetts. Destinations and places of residence outside of the six New England states are presented at the county level. Persons who work at home are included with those who commute to a job in their home city or town). Destinations and places of residence are in descending order from the largest number of commuters to the smallest number. Included in the report are the numbers of workers who commute, those workers as a percent of the total number of workers who commute, and the cumulative percents of commuters. Destinations and residences other than the top 10 are shown as 'Other States' for the six New England states and New York, and 'All Other.' Destinations and residences are mostly comprised of cities and towns in Massachusetts or in neighboring states, but they may also be in other states or foreign countries. Those numbers are generally small and are placed in the 'All Other' group. In addition to detailed city and town data, county-level summary data are provided for the 14 counties of Massachusetts and a state-level summary for the six New England states and New York. The county summary shows the top 10 county destinations and top 10 counties of residence for workers who live or work in Massachusetts counties, along with 'Rest of [State]' for the six New England states and New York, and 'All Other.' The state summary tables show worker commuting patterns by state of residence and state of work. This includes the numbers of workers who commute, those

workers as a percent of persons who work in the state, and commuters as a percent of all workers who live in the state.

DATA DESCRIPTION

These data come from the *1990 Census of Population, Summary Tape File S-5, Number of Workers by County of Residence by County of Work*. The sample includes all persons in the U.S. who were 16 years old or over and who were employed and at work either as civilians or as members of the U.S. Armed Forces during the census reference week (the calendar week preceding the date on which the respondents completed questionnaires). The data are estimates based on a sample of approximately 16% of the population.

DATA AVAILABILITY

The tables that are printed in this report are available in Quattro Pro Version 1.0 for Windows spreadsheets. More disaggregate data is available in Paradox Version 4.0 database files and ASCII files. Extracts can be taken from any of the file formats. (Contact MISER for a cost estimate). Table 3, "Top Ten Destinations and Top Ten Origins of Workers in Massachusetts Cities and Towns", is also available on-line through the Massachusetts Policy Database. Visit the MASH website at:

<http://www.umass.edu/miser/mash/mashindx.htm>

for further information, or call MISER directly at (413) 545-3460.
